

NATIONAL ONLINE FACULTY DEVELOPMENT PROGRAM
INTERPRETATION OF SUSTAINABLE DEVELOPMENT GOALS
IN ARCHITECTURE PEDAGOGY - HISTORY, HUMANITIES & CONSERVATION

19th December 2022 - 23rd December 2022

PREAMBLE

The 2030 Agenda for Sustainable Development states that the Sustainable Development Goals (SDGs) are integrated and indivisible and balance the three dimensions of sustainable development (economic, social, and environmental). In architecture education, the relationship between practice and sustainability needs to be examined to understand the interpretations of the concept and implement the same. Architectural education is vital in understanding environmental and social issues and increasing awareness of SDGs amongst architects and students. The aim is to understand the SDGs from history, humanities & conservation point of view.

Key Take-Aways for Participants :

1. The 17 SDG Goals will be interpreted by architects from various fields for effective implementation in the architecture fraternity.
2. Faculties will be able to incorporate SDG goals and their interpretation in the teaching and learning process.
