Preamble

Quantitative methods for Qualitative Research in Architecture & Planning presents research as a systematic process, provides an in-depth explanation of different research methods, and explains how to choose appropriate research methods and conduct research studies. It outlines the process of documenting, disseminating knowledge and applying research findings in the fields of architectural design and planning.

More importantly, it provides guidelines for the integration of research into the profession and utilizes case studies and practical examples to illustrate key concepts, procedures and applications. The program would be beneficial for faculty members and practicing architects interested in research and those aspiring to a doctorate.
