## Significance of the Program

Architecture is a combination of Technology, Science and Art. All these characteristics are co related to each other with in the scope of architectural education. Student should learn how to deal with all of these factors. Architectural education should involve understanding technical knowledge of structures, materials and construction, services. At the same time, understanding of the process of technical design, and integration of structure, construction technology and services into functionally effective architectural design is also important. Relationship of architectural design and technology and services is a necessary and inseparable part of design process.

Successful teaching emerges when teacher understands changing trends in teaching-learning process. This training program specially designed for teachers involved in architecture education. It aims to explore innovative ideas and techniques to teach technical subjects in architecture curriculum so that it attracts student's attention in the classroom and makes learning sessions interactive and interesting for the students. It will also focus on understanding the Integration of technical knowledge with other subjects to bring architectural design into reality. The program invites people with innovative teaching methods and creative ideas to deliberate and demonstrate teaching techniques.
